

### **How to get your results**

#### **For patients or samples that have been mailed for examination**

The results of patient examinations or of samples that have been sent to us for testing can be received through the electronic results monitoring system, through courier or by mail.

The customers can signify that they wish to be informed about the results by phone or fax by ticking the relevant option in the request form and by filling in the phone number on which they wish to be called or to which they wish to have the results sent. Finally, it is worth noting that for security reasons each fax number provided should be double-checked by the customer for its validity, as it will be used to forward private and confidential medical information.
